TIHM (TECHNOLOGY INTEGRATED HEALTH MANAGEMENT) for dementia

Harnessing the Internet of Things to support independent living for people with dementia

Author Details:

Dr Helen Rostill, Director of Innovation and Development, Surrey and Borders Partnership NHS Foundation Trust and Senior Responsible Officer for the TIHM for dementia clinical trial.

Amanda Morgan, Head of Communication and Marketing TIHM for dementia clinical trial.

Professor Payam Barnaghi, Professor of Machine Intelligence, Department of Electrical and Electronic Engineering, University of Surrey.

Professor Emma Ream, Director of Health Science Research, University of Surrey.

Dr Ramin Nilforooshan, Consultant Psychiatrist and Associate Medical Director R&D, Surrey and Borders Partnership NHS Foundation Trust.

Acknowledgement:

We gratefully acknowledge funding from the Department of Health and the much valued support of the NHS England National Test Bed Team and the Office for Life Sciences, in particular Dr Mark Nassar and Chris Sawyer from Innovate UK. We would like to thank all of the individuals, groups and organisations that supported the work of the TIHM for Dementia Test Bed.

We are much indebted to our Trusted User group for allowing us and our technologies into their homes and to Trevor Truman, Carer Representative, for his important contribution. Finally, this study would not have been possible without the people with dementia and their carers who most generously gave their time to participate in this study.
